1. Year and Semester : 2013 SRING

2. Course Number : CS-492

3. Course Title : Kinect Programming

4. Work Number : PR-04

5. Work Name : Kinect Project Abstract

6. Work Version : Version 1

7. Long Date : Friday, 12, April, 2013

8. Author(s) Name(s) : Jake Waffle

Kinect Project Abstract

I'm pretty sure that most people have wished they had their own theme song, one that reacts to how they're feeling. My project uses the Kinect to generate what I've previously described. The Kinect allows a computer to see in 3D and track the skeleton of people. Then my program uses Psychology to interpret the user's pose and generate theme music that suits how they're feeling.
